"...crystal clear, very melodic and original electronica."

Menu:Exit comprising of Markward Wagner and Ralf Pytlik founded Underscan Records and first called attention with their almost classic debut release "Profiles EP" in 2001.

With the four track EP "Vool" Menu:Exit now delivers the follow-up release with moody thoughtful harmonies that virtually makes the listener want to melt into his seat.

Maintaining the harmonic, devotional excursions of "Profiles", the Berlin duo present us with a delightful slice of sonic sorcery.

The lead track "Vool" inverts a playful flamenco spirit, "Cherlisc" pans defiantly across a guitar led soundscape, whilst "lyf" and "Linger" extend the blissful sparkling beat controlled surfaces.

The unmistakable colour of Minor lays like a blissful spirit in all Menu:Exit tracks. Almost classical elements deriving from acoustic sound sources contrast to the finetuned modern rhythm and thus achieve a unique listening pleasure.
